JOB DESCRIPTION

Role: Cloud Support Associate @ Amazon Web Services

Candidate needs to:

- Apply advanced troubleshooting techniques to provide unique solutions to our customers' individual needs
- Work directly with Amazon Web Service architects to help reproduce and resolve customer issues
- Leverage extensive customer support experience to provide feedback to internal AWS teams on how to improve our services
- Work on projects that improve support-related processes and customers' technical support experience
- Write tutorials, how-to videos, and other technical articles for the customer community
- Work on critical, highly complex customer problems that may span multiple AWS services
- Interact with leading technologists around the world

Desired Candidate Profile

- Good knowledge in Java programming, Data Structures, OOPS concepts
- Good understanding of distributed computing concepts
- Good understanding of OS Linux (Sys Admin concepts)
- Good knowledge of Networking concepts (TCP/IP, OSI Model, DNS/DHCP etc)
- Good communication skills (written and verbal)
